TABLE OF CONTENTS

INTRODUCTION

Early Childhood Iowa (ECI) Indicators

The Early Childhood Iowa (ECI) provides resources and tools to help every community in the state with developing capacity to meet ECI's vision that *"every child, beginning at birth, will be healthy and successful"*. Among these tools are data indicators to support local area boards in their data informed decision making and to monitor progress across five legislatively mandated result areas:

· Healthy children,
· Children ready to succeed in school,
· Safe and supportive communities,
· Secure and nurturing families, and
· Secure and nurturing early learning environments.

Taken together, these indicators provide a useful overview of the multiple dimensions of child wellbeing that may impact quality of life for Iowa's young children and their families. The ECI State Board regularly reviews and approves an updated list of indicators. *Indicator and Data Dictionary Tool* includes detailed information on the type, quality, availability, and frequency of assessment for community-wide measures used in official ECI reports.

Iowa Data Drive

IA Data Drive is a free online interface developed by I2D2 at Iowa State University with a goal to improve understanding and provide support for decision-making relevant to early childhood programs in Iowa. In a nutshell, it brings together information about key indicators into an interactive dashboard from federal, state, and local datasets covering more than a decade. IA Data Drive enables users to source, organize, and visualize data so it can be summarized effectively and used by people at all stages of the data-use spectrum.

Tools in the Data Drive include maps and trend charts, data tables, and downloadable reports for further use or integration. It also provides accurate descriptions of the indicators, references to the data sources, and other important details. IA Data Drive webpage includes a manual and a navigation tutorial to help users maximize utility of the tools available in the dashabord.

Data and Suppressed Values

IA Data Drive uses publicly available administrative data along with I2D2 data holdings to compute ECI approved indicators covering topics such as education, child health, available services, and others. It should be noted that some indicators were not available or could not be computed for all geographies (counties, ECI areas) due to data suppression implemented by (data-providing) agencies in order to protect confidentiality. Methods and thresholds applied to limit the disclosure of information varies among agencies.

Iowa Department of Health and Human Services (HHS) suppressed any data (including aggregate counts and statistics) that were based on counts of **five or fewer** to comply with its data policy. The same criteria was hold by I2D2 for releasing indicators computed using I2D2 Vital Statics Birth Records data.
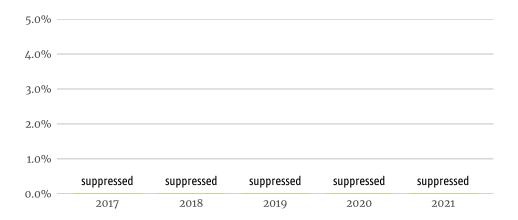

Data were also restricted for FAST outcomes in ECI Kindergarten Assessment Tables. Data for districts with **less than 30** students tested were suppressed in the reports, therefore those school districts were not taken into account when computing county, ECI area, or statewide values.
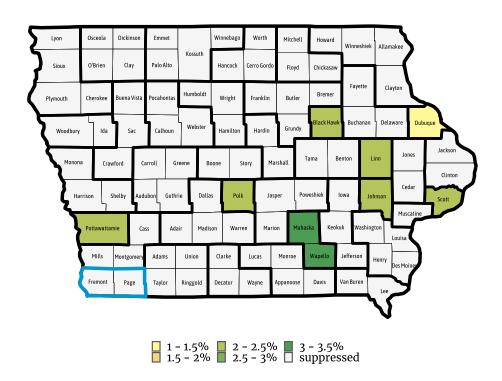

Although not observed yet, but there might be suppression values in the American Community Survey (ACS) data. In that case the suppressed estimates will be missing in the original data files. For additional information on ACS data suppression see the Census Bureau website.

Homelessness Count

Point in Time counts of sheltered and unsheltered homeless individuals per 10,000 population.

Individual Birth Risk - Inadequate Prenatal Care

Percentage of children born of mothers who received inadequate prenatal care.

Individual Birth Risk – Teenage Mother

Percentage of children born of teenage mothers.

Individual Birth Risk – Unmarried Mother

Percentage of children born of unmarried mothers.

Individual Birth Risk – Low Maternal Education at Birth

Percentage of children born of mothers with low education.

Individual Birth Risk – Poverty at Birth

Percentage of children born of mothers being susceptible to poverty.

Individual Birth Risk – Prenatal Tobacco Exposure

Percentage of children born of mothers who smoke during pregnancy and/or three months prior to becoming pregnant.

Individual Birth Risk – Preterm or Low Birth Weight

Percentage of children born preterm or with low birth weight.

Cumulative Birth Risks

Percentage of children with 0, 1, 2 or more, or 3 or more risk factors. Note, cumulative risk was calculated by adding risks that were present at the time of child birth, including the following risks: unmarried mother, teenage mother, low maternal education, prenatal tobacco exposure, poverty, inadequate prenatal care, and preterm or low birth weight. This indicator has a maximum possible score of 6 as low maternal education and teenage mother were mutually exclusive.

Incidence of Child Abuse

Child abuse incidence rate per 1,000 for children 5 years and under..

Mothers Under 20

Rate of live births born to women aged 15 to 19 per 1,000 women in this age range.

Domestic Violence

Rate of domestic abuse per 100,000 population.

Domestic Abuse Incident Characteristics

Percentage of domestic abuse incidents by child presence.

Availability of Child Care

Number of slots (spaces) potentially available for children in DHS licensed centers/preschools or registered child development homes.

Working Parents

Percentage of children under 6 years with all parents in the labor force.
